COLIBRI RESOURCE CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THREE MONTHS ENDED FEBRUARY 28, 2007 AND 2006

(Unaudited – Prepared by Management)

1. BASIS OF PRESENTATION

The consolidated financial statements contained herein include the accounts of Colibri Resource Corporation and its wholly owned subsidiary, Minera Halcones S.A. de C.V. (“Halcones”). Halcones was incorporated on March 30, 2004 in Mexico. All significant inter-company accounts and transactions have been eliminated upon consolidation.

The interim consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in annual financial statements prepared in accordance with Canadian generally accepted accounting principles has been condensed or omitted. These interim period consolidated statements should be read together with the Company’s audited consolidated financial statements and the accompanying notes for the year ended November 30, 2006. In the opinion of the Company, its unaudited consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

2. NATURE AND CONTINUANCE OF THE BUSINESS

The Company was incorporated on February 20, 2004 in the province of British Columbia. The Company is pursuing opportunities in the exploration of mineral and natural resource properties in Mexico and is considered to be in the exploration stage.

The Company is in the process of acquiring and exploring its mineral properties and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. Continued operations of the Company are dependent on the company’s ability to receive continued financial support, complete public equity financing, or generate profitable operations in the future.

The Company's ability to continue as a going concern in the short term is dependent upon its ability to obtain financing. The Company has obtained financing by the issuance of share capital. Although the Company has been successful in the past in obtaining financing, there can be no assurance that it will be able to obtain adequate financing in the future or that the terms of such financing will be favourable.
